EPA Region IX approves the Detention Basin Evaluation - Plan of Study dated June 29, 2012, submitted to EPA on June 30, 2012 as submitted subject to two conditions.

Both conditions pertain to the water quality sampling effort described on page 4 of the submitted plan of study (4th bullet in description of Scope of Work). First, EPA requests that WMH delete the word "representative" from the fifth sentence of this bullet. If you wish to substitute the term "useable and appropriate" for this term, EPA would not object to this substitution. Second, EPA requests that WMH add the following sentence to the end of this bullet: "In no event will sampling for purposes of completing the detention basin evaluation continue beyond June 30, 2013."

As provided for by the Amended Administrative Order, WMH may request the opportunity to meet and confer with EPA Region IX if it objects to the conditions on our approval of the Plan of Study. If WMH does not object to these conditions, WMH may treat these conditions as modifications to its Plan of Study and implement the Plan of Study as modified.
